Art Unit: 3753

This action is responsive to the communication filed October 15, 2003.

The amendment filed September 8, 2003 has been entered.

Claim 1 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim says that each on-off device can be a single valve. In this case there is no adjacent valve. The subsequent recitation that the valve mounts have channels holding the adjacent valve ports in communication is meaningless and indefinite.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 is rejected under 35 U.S.C. §102(b) as being anticipated by JA 7-286720. JA 7-286720 shows a fluid control apparatus including MFC 53, on-off devices comprising two port valves 56, 55 and valve mounts 10, 11.
